PREFACE

After almost eighteen months and many thousands of hours reading the federally printed microfilms, the Midland Genealogical Society has completed the publication of the Midland County census from 1850 through the State census of 1894, including the special 1890 veterans census. Since not all information on the original census could be included, it was decided to include information of most interest to genealogists.

The column for "color" was omitted, since most residents were white. However, those indicated as non-white are listed on page 406. The 1894 state census included a column for veterans of the Civil War or their widows. This was omitted from this publication because the 1890 special census was much more complete. On the 1870 census, F.B. means foreign born.

Experienced genealogists have learned that data on census records are open to question sometimes. Some enumerators were very lax in asking all the questions and filling in all the spaces correctly. Certainly, many children listed "at home" were attending school, but because the census was taken during the month of June, these students perhaps had already completed their studies for the year.

An effort was made to decipher some of the surnames so they were recognizable. Already published sources were used for this checking. It should be remembered that the enumerator wrote the name as he heard it. A ? means the name was illegible.

Many thanks go to the several dozen Society members who gave unselfishly of their time to read the census tapes. It was an enjoyable experience, but frustrating at times.
